Hangar Development

Hangar development nears completion.

After several years of planning, New Garden Flying Field opens the doors to the new east end hangar facility. These new state of the art hangars will welcome

13 new additional aircraft and pilots to the airport and community. The hangar project was funded by Pennsylvania's first

Multimodal Transportation Fund Grant. "We are very excited to be able to offer a

range of hangars at the airport for all types of aircraft owner's budgets. Focusing on general aviation pilots as a whole and

recognizing customer's interests, we are now able to help pilots

find a solution from an affordable tie down to a modern spacious

Future Aviators 2016

The Future Aviators Summer Camp held in July and August was a big success with 150 campers attending the camp this year.

Stay tuned for the 2017 date announcements coming soon.

hangar for their aircraft. There is a wide range in values for aircraft and owner's hangar interests are not a one size fits all. We feel the new east end facility will be a much welcomed addition to our offerings for current and future tenants."

Jon Martin, Aviation Director.

Runway Reconstruction Project

The Runway Reconstruction Project is moving along. Here are a few progress photos. Starting October 10th the airport will close the runway for 15 days and nights to complete the rip-up, removal and replacement of the asphalt surface of the runway. Until now the construction focus has been removing the obstructions and preparing the Runway Safety Area and Obstacle Free Area for the new runway surface.

The 45th Festival of Flight In Review

This year's aviation extravaganza was held on August 20-21. The weather Friday and Saturday was HOT, however blue skies and light winds provided us perfect flying weather. Sunday could be described in another three letter word. WET! The airshow was able to get the WWII trainer flight in on Sunday but soon after the skies opened up with rain for the remainder of the afternoon.

“We do everything we can as event planners to provide the community with an event that is enjoyable for the entire family. This year for the 45th air show at New Garden, we planned a tremendous lineup from WWII and antique aircraft to world renowned aerobatic performers. Sunday we put on a first for New Garden Airport, The Rock N Roll Runway 5K Race. Although it rained on Sunday we had a great weekend full of aviation fun and excitement. Best of all, we were honored to have over 100 volunteers from the community helping out throughout the weekend. Thank you to all the individuals for coming out and spending countless hours at the airport working to make this year's event a success.” Jon Martin, Aviation Director

Here are a few photos from this year's Air & Car Show (& 5K race). **Thank you Richard Souza for the fabulous photos.**

THANK YOU AIR SHOW VOLUNTEERS.
